how did free trade emerge in early modern times how did the mediterranean as a specific region with its own historical characteristics produce a culture in which the free port appeared what was the relation between the type of free trade created in early modern italy and the development of global trade and commercial competition between states for hegemony in the eighteenth century and how did the position of the free port originally a mediterranean invention develop over the course of time the contributions to this volume address these questions and explain the institutional genealogy of the free port free trade and free ports in the mediterranean analyses the atypical history and conditions of the mediterranean region in contradistinction with other regions as an explanation for how and why free ports arose there this volume engages with the diffusion of free ports from a mediterranean to a global phenomenon whilst staying focused on how this diffusion was experienced in the mediterranean itself the contributions to this volume bring together the traditional issues of religious openness and tolerance in physically separated areas and the role of consuls and governors via fiscal techniques architectural and administrative aspects with questions about geopolitical balance and primacy the book will be of interest to scholars in a wide range of historical sub disciplines early modern mediterranean global economic political and institutional just to mention a few and to students wishing to perfect their knowledge of the mediterranean and its global interconnections and of the origins of free trade

in the twilight of the renaissance the grand duke of tuscany a scion of the fabled medici family of bankers invited foreign merchants artisans and ship captains to settle in his port city of livorno the town quickly became one of the most bustling port cities in the mediterranean presenting a rich tableau of officials merchants mariners and slaves

nobody could have predicted in 1600 that their activities would contribute a chapter in the history of free trade yet by the late seventeenth century the grand duke's invitation had evolved into a general program of hospitality towards foreign visitors the liberal treatment of goods and a model for the elimination of customs duties livorno was the earliest and most successful example of a free port in europe the story of livorno shows the seeds of liberalism emerging not from the studies of philosophers such as adam smith but out of the nexus between commerce politics and identity in the early modern mediterranean
