the purpose of this book is to present a comprehensive review of deception its essential component of neurolinguistic dialectics and how it is used by satan to corrupt the human mind from devotion to jesus christ these theological subjects are explored in an interdisciplinary fashion in an attempt to reveal historical knowledge of religious and secular developments of the ages needed to understand spiritual failure deception sin apostasy the role of the human mind as the venue or battlefield of deception and how faith in god becomes weak and susceptible to doubt always at issue here is why humanity replicates behavior that regresses to the same results of apostasy and utter spiritual failure induced by deception this interdisciplinary approach eludes the prototypical one dimensional approach to understanding deception and sin and presents the reader with a how to methodology that will hopefully defeat deception and sin it also shows how deception results from heretical doctrine advanced by false prophets and preachers moreover this book will help readers hone their skills necessary to examine issues of contemporary life with critical thinking in the context of religious and human history that facilitates their becoming better human beings

first published in 1987 new information obtained from the declassification of ultra intercepts and other second world war documents as well as from recent scholarly research has credited allied deception operations with an even more important contribution to winning the war than was previously supposed yet deception is only one factor in the achievement of victory it cannot guarantee success it must be fully understood and exploited by the highest levels of command most histories of deception operations during the second world war have focused on those that were successful instances in which deception operations failed to achieve their objectives are discussed by john campbell who describes an early attempt to convince the germans that the allies intended to invade at pas de calais in the summer of 1943 and by katherine herbig who gives the first detailed description of us deception operations in the pacific klaus jurgen moier questions the actual effectiveness of deception operations against the germans he argues that many successes attributed to the allies use of deception were in fact achieved by independent considerations on the german side professor moier builds a particularly strong case in challenging the success of operation fortitude north in which the allies tried to divert german troops to norway before invading normandy although very little is known of soviet deception operations on the eastern front it must be remembered that they were conducted on a much larger scale than those of either the british in europe or the americans in the pacific colonel david glantz s account of soviet deception and covert activities offers a version of the historiography of the war between the ussr and germany which may explain some of the monumental german failures tom cubbage not only contributes a synthesis of the primary and secondary sources available on the deception operations preceding overlord but also reviews the so called hesketh report fortitude a history of strategic deception in north western europe april 1943 to may 1945 colonel roger hesketh s official report on allied deception operations against the germans in north west europe which was declassified in 1976 yet remains unpublished it indicates that professor muller s suspicions that the allies over estimated the impact of fortitude are unfounded edited and with a comprehensive introduction by michael handel these important and original studies put the entire deception effort during the second world war into a more balanced and accurate perspective

i speak the truth not so much as i would but as much as i dare montaigne all cruel people describe themselves as paragons of frankness tennessee williams truth and deception like good and evil have long been viewed as diametrically opposed and unreconcilable yet few people can honestly claim they never lie in fact deception is

practiced habitually in day to day life from the polite compliment that doesn't accurately relay one's true feelings to self-deception about one's own motivations what fuels the need for people to intricately construct lies and illusions about their own lives if deceptions are unconscious does it mean that we are not responsible for their consequences why does self-deception or the need for illusion make us feel uncomfortable taking into account the sheer ubiquity and ordinariness of deception this interdisciplinary work moves away from the cut and dried notion of duplicity as evil and illuminates the ways in which deception can also be understood as an adaptive response to the demands of living with others the book articulates the boundaries between unethical and adaptive deception demonstrating how some lies serve socially approved goals while others provoke distrust and condemnation throughout the volume focuses on the range of emotions from feelings of shame fear or envy to those of concern and compassion that motivate our desire to deceive ourselves and others providing an interdisciplinary exploration of the widespread phenomenon of lying and deception this volume promotes a more fully integrated understanding of how people function in their everyday lives case illustrations humor and wit concrete examples and even a mock television sitcom script bring the ideas to life for clinical practitioners behavioral scientists and philosophers and for students in these realms

the contemporary literature on self-deception was born out of Jean-Paul Sartre's work on bad faith lying to oneself as time has progressed the conception of self-deception has moved further and further away from Sartre's conception of bad faith in self-deception's puzzles and processes a return to a Sartrean view Jason Kido Lopez argues that this departure is a mistake and that we should return to thinking about self-deception in a Sartrean fashion in which we are self-deceived when we intentionally use the strategies and methods of interpersonal deception on ourselves since literally tricking ourselves cannot work we will always see through our own self-deception after all self-deception merely consists of the attempt to trick ourselves in this way other scholars have rejected this notion of self-deception historically dismissing it as paradoxical Lopez argues first that it isn't paradoxical and he further suggests that moving away from this notion of self-deception has caused the contemporary literature on the topic to be littered with disparate and conflicting theories indeed there are a great many ways to avoid the allegedly paradoxical Sartrean notion of self-deception and the resulting plethora of accounts lead to a fragmented picture of self-deception if however the Sartrean view isn't paradoxical then there was no need for the host of contradictory theories and most researchers on self-deception have missed what was originally so intriguing about self-deception that it like bad faith is the process of literally trying to trick oneself into believing what is false or unwarranted self-deception's puzzles and processes will be of great interest to students and scholars of epistemology philosophy of mind psychology and continental philosophy and to anyone else interested in the problems of self-deception

this critically original analysis of Little Dorrit sees Dickens' novel of imprisonment to be a cunning presentation of deception in the self and society through a close reading of the artistic elements that cohere to form the unity of this novel the author uncovers Dickens' duplicitous strategies in narrative theme and characterization Professor Rotkin's psychological approach focuses rewardingly on the equivocal portraits of Dickens' central characters in terms of their anti-heroic traits which Dickens camouflages for Victorian readers this incisive study expands our understanding of Dickens' conscious artistry in his experiment with theme and structure that signals his movement away from the Victorian ideal toward a modern twentieth-century world view
